2023 - 2025

Coimbatore Institute
of Technology,
Coimbatore

Graduation

Pursuing second year Master Degree in the field of Decision and Computing Sciences at the renowned Institution "Coimbatore Institute of Technology"

PROJECT

Loan Prediction

Developed a Loan Prediction Model using Python to assess loan eligibility based on customer data. Implemented data preprocessing, feature engineering, and model evaluation techniques to improve accuracy. The project aimed to enhance decision-making efficiency for financial institutions by providing reliable loan approval predictions.

Stock Market Simulator

Developed a Stock Market Simulator using Java and APIs to provide real-time market data and simulate trading strategies. Integrated external financial APIs for live stock price updates and implemented core functionalities such as portfolio management, trade execution, and performance analysis. Designed the system to help users understand market dynamics and test investment strategies in a risk-free environment.
